Art Unit: 1621

Claims 1-18 are pending in this application which should be reviewed for errors.

An initialed copy of applicants' 1449 is attached. The US 4,277,992 reference has not been considered. The patent by that number is unrelated and the inventor is not Garwood et al.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Blain et al., US 5,026,933, in view of the acknowledged prior art. Blain et al. discloses olefine oligomerization with a surface deactivated ZSM-23 catalyst wherein reactants and products as well as reaction conditions overlap applicants'. Further reaction to produce alkylbenzenes and alkylphenylsulfonates is also disclosed. The instant invention differs from the teaching of Blain et al. in that hydroformulation to produce

Art Unit: 1621

alcohols is not disclosed and in that use of a propylene and butylenes feedstock is not exemplified. The acknowledged prior art is that of paragraphs 0020 to 0024 where it is acknowledged that hydroformylation of olefins to produce alcohols is old. It would have been prima facie obvious at the time the invention was made to one of ordinary skill in the art to start with the teaching of Blain et al. and the acknowledged prior art, to use applicants' processes and to expect to produce their products. Although not exemplified, Blain et al. discloses that "It is also possible to oligomerize a mixture of propylene and butane and to obtain a mixture of oligomers having at least 6 carbon atoms" (Col. 5, ll 58-61).

Claims 1-15 directed to an invention not patentably distinct from the claims of commonly assigned 10/509,165 and 10/509,356. Specifically, they generically overlap.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-15 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over the claims of copending Application No.'s 10/509,165 and 10.509,356. Although the conflicting claims are not

Art Unit: 1621

identical, they are not patentably distinct from each other because they generically overlap.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

No claim is allowed.
